

# Kaya Presents a New Range of Vodka Flavours

Flavored liquor has become a new range since people started mixing at home to create homemade infusion and cocktails at house parties. Now, to help savvy hosts have a great party, Kaya Blenders & Distillers Limited has introduced two new flavours for their vodka so that hosts don't have to waste time mixing ingredients into drink, have a cocktail just rightly made.

First up is Pineapple Vodka by Kaya, which is the life of every party. It stays crisp and fresh under situations of extreme pressure. This drink gives you a taste of tropical islands. It is made with an infusion of natural pineapple flavour and when mixed up, it can give a sweet and tangy boost to your drink.

This pineapple-flavoured vodka is absolutely delicious; you can mix it with coconut milk or coconut water to have your own version of Pina Colada. It is strong and gives a powerful punch with its tangy flavour. It can even be mixed with orange, strawberry and seltzer water to make it fizzy. It goes great with orange juice. It is a daring twist to the ordinary vodka. You can also make a pineapple martini, or use Pineapple vodka in your favorite cocktail for a vacation from the ordinary.

The other new flavour of vodka introduced by Kaya is coconut. Transport yourself to a tropical island with the sweet smell of coconut by mixing a cocktail with Kaya's Coconut Vodka. The taste of this vodka is best when it is cold, so make sure to keep it in the recesses of the fridge. You can have a round of Coconut Vodka shots with your friends or family after a good dinner and it will be the best thing ever.

Coconut Vodka by Kaya Blenders & Distillers Ltd. is smooth and has a refreshing coconut taste that would be great in mixing with Pina Colada. It can also be added to a freshly chilled pitcher of iced tea to make it spectacular. Using natural ingredients, the infused coconut flavour is not too sweet, but still, delivers a taste of the tropics and makes for a smooth drink with an easy finish.
